This will be a 3-day seminar designed to help the K9 Handler think outside the box when it comes to deployment of K9 using realistic training scenarios based on actual live deployments. Handlers will be given the building blocks needed to develop the K9 Team from basic movements to high stress realistic training scenarios. Topics covered include: vehicle bailouts, door pops away from vehicle, high risk stops and vehicle assaults and will take the training beyond basic level deployments to controlled chaos so when the real high stress deployment occurs, it's not chaos for the K9 Team.
